1. Executive Summary

KasamaHR is a modern, cloud-based **Human Resource Information System (HRIS)** purpose-built for Philippine organizations. The platform provides a comprehensive suite of HR management tools — from employee record-keeping and payroll processing to performance management and recruitment — all designed with full compliance to government mandates including SSS, PhilHealth, Pag-IBIG, and BIR requirements.

This proposal presents KasamaHR as a strategic solution for the **Local Government Unit (LGU) of Butuan City** to digitize and streamline its human resource operations. The system is designed to improve operational efficiency, enhance transparency and accountability, and ensure compliance with Civil Service Commission (CSC) and Commission on Audit (COA) requirements.

With over **18 integrated modules** — including **4 LGU-specific modules** for Service Record Generation, Plantilla Management, CSC Report Templates, and Multi-Office/Satellite support — an employee self-service portal with **25+ features**, and support for **biometric device integration**, KasamaHR offers a complete digital transformation solution purpose-built for local government human resource management.

2. Background & Problem Statement

Local Government Units across the Philippines face significant challenges in managing their human resource operations. Many LGUs continue to rely on manual, paper-based processes that lead to inefficiencies, errors, and compliance risks. The following challenges are commonly observed:

- **Manual HR Processes:** Paper-based workflows for leave applications, overtime requests, and payroll processing consume significant staff time and are prone to human error.
- **Vulnerable 201 Files:** Physical employee records (201 files) are susceptible to loss, damage, and unauthorized access, making audits difficult and time-consuming.
- **Payroll Complexity:** Manual computation of government contributions (SSS, PhilHealth, Pag-IBIG, withholding tax) and payroll processing creates risk of calculation errors and compliance violations.
- **Limited Performance Tracking:** Without a systematic approach to performance evaluation, goal setting, and competency assessment, employee development and accountability suffer.
- **No Self-Service Capabilities:** Employees depend entirely on HR staff for routine tasks such as checking leave balances, requesting documents, or viewing payslips — increasing HR workload.
- **Lack of Data Analytics:** Without centralized, digital HR data, leadership lacks the insights needed for strategic workforce planning and evidence-based decision-making.
- **Compliance Training Gaps:** Tracking mandatory compliance training, certifications, and professional development across all employees is difficult to manage manually.
- **Attendance Tracking Challenges:** Manual attendance monitoring and DTR preparation is labor-intensive and prone to discrepancies.
- **CSC Reporting Burden:** Generating Civil Service Commission reports, maintaining plantilla records, and producing service records manually is complex and error-prone.

KasamaHR directly addresses each of these challenges through a unified, digital platform that automates processes, ensures data integrity, and empowers both HR administrators and employees.

3. Proposed Solution — KasamaHR

KasamaHR is a comprehensive, web-based HRIS featuring 18 fully integrated modules — including 4 modules designed exclusively for Local Government Units. Each module is designed to address specific HR management needs while working seamlessly together to provide a unified experience.

3.1 Employee Management (Digital 201 File)

Complete digitization of employee records with comprehensive profile management:

- Complete employee profiles — personal information, employment details, government IDs, compensation, and documents
- Employee status lifecycle tracking (active, probation, suspended, separated) with full history
- Department and position assignment with historical tracking of all changes
- Compensation management with salary grade integration and change history
- Digital business cards with QR codes for professional networking
- Employee document repository with version control

3.2 Attendance & Time Management

Automated time tracking with biometric device integration:

- Biometric device integration via MQTT protocol supporting facial recognition terminals
- Automated Daily Time Record (DTR) generation with computation of late minutes, undertime, overtime, and night differential
- Kiosk terminal support for time clock punch-in at office locations
- Real-time device monitoring with online/offline status and sync logs
- Work schedule configuration with flexible shift management
- Automatic sync of employee data to biometric devices

3.3 Leave Management

- Support for multiple leave types (vacation, sick, special privilege, maternity, paternity, solo parent, etc.)
- Multi-level approval workflows with configurable approvers
- Automatic leave balance tracking, accrual, and adjustments
- Interactive leave calendar view for team scheduling
- Half-day and full-day application support

- Leave history and usage analytics

3.4 Overtime Management

- Overtime request submission with justification and details
- Multi-level approval workflow with configurable approvers
- Overtime type classification (regular, rest day, holiday, etc.)
- Seamless integration with payroll for automatic overtime pay computation

3.5 Payroll System

End-to-end payroll processing with automatic government compliance:

- Complete payroll processing — basic pay, overtime pay, night differential, holiday pay, allowances, and bonuses
- Automatic government contribution computation (SSS, PhilHealth, Pag-IBIG, withholding tax) using up-to-date contribution tables
- Deduction management for loans, salary adjustments, and other deductions
- Payslip generation with detailed breakdown accessible by employees
- BIR 2316 certificate generation for year-end tax reporting
- Payroll period and cycle configuration for flexible pay schedules

3.6 Government Contributions & Reports

- Built-in contribution calculators for SSS, PhilHealth, Pag-IBIG, and withholding tax
- Automatic generation of government-mandated reports (SSS R3/R5, PhilHealth RF-1, Pag-IBIG MCRF, BIR 1601-C/2316)
- Contribution table management with bracket-based computation
- Report export capabilities for submission to government agencies

3.7 Performance Management

Comprehensive performance evaluation framework aligned with CSC guidelines:

- Configurable performance evaluation cycles (annual, mid-year, quarterly)
- Goal setting framework supporting both OKRs and SMART goals with key results and milestones
- KPI templates with assignment and progress tracking
- Competency-based evaluations with proficiency levels
- Multi-reviewer evaluation system (self-assessment, peer review, supervisor evaluation)
- Individual development plans with activities, check-ins, and progress tracking
- Performance analytics dashboard with trend analysis

3.8 Recruitment (Full Lifecycle)

Complete recruitment pipeline from requisition to onboarding:

- Job requisition requests with multi-level approval workflow
- Job posting creation and management with public careers portal

- Candidate tracking — profiles, education, work experience, and application status
- Interview scheduling with panel management and feedback
- Assessment, background check, and reference check management
- Offer generation with customizable templates and digital signatures
- Recruitment analytics dashboard with pipeline metrics

3.9 Onboarding & Preboarding

- Customizable onboarding and preboarding templates with task checklists
- Employee self-service checklist completion with progress tracking
- Probationary evaluation criteria templates and tracking
- Automated task assignment and deadline management

3.10 Training & Development

- Course creation with categories, materials, and session scheduling
- Training calendar with visual schedule management
- Employee enrollment with waitlist management and approval workflows
- Training history tracking per employee
- Employee certifications management with expiry tracking

3.11 Compliance Management

- Compliance course creation with modular content and assessments
- Auto-assignment rules based on department, position, or employee criteria
- Progress tracking with attempt history and scoring
- Certificate generation upon course completion
- Compliance dashboard with organizational coverage reporting

3.12 Employee Self-Service Portal

A comprehensive self-service portal with **25+ features** empowering employees to manage their own HR needs:

- | | |
|--|-------------------------------------|
| • Personal dashboard & profile | • Overtime request submission |
| • Leave applications & calendar | • Company announcements |
| • Leave balance viewing | • Schedule viewing |
| • Loan applications & history | • Preboarding checklists |
| • Payslip viewing & downloading | • Onboarding progress |
| • Daily Time Record (DTR) access | • Probationary status tracking |
| • Goal management | • BIR 2316 certificate access |
| • Development plan tracking | • Visitor management |
| • Performance evaluation participation | • Leave approvals (for supervisors) |
| • Training enrollment & history | • Loan approvals (for approvers) |
| • Compliance progress & certificates | • Training approvals |

- Certifications management
- Document requests
- Self-evaluation submission
- Peer review participation

3.13 Loan Management

- Employee loan applications with configurable approval workflows
- Payment tracking with automatic payroll deduction integration
- Loan history and outstanding balance management

3.14 Document Management

- Employee and company-wide document repository with categorization
- Document versioning for tracking changes and updates
- Employee document request system for certificates and clearances

3.15 Visitor Management

- Visitor registration and check-in/check-out logging
- Device integration for visitor tracking at entry points

3.16 Analytics & Dashboards

- HR analytics dashboard with workforce metrics and trends
- Recruitment analytics with pipeline and hiring metrics
- Performance analytics with evaluation trends and distributions
- Compliance reports with coverage and completion rates
- Comprehensive audit logging for transparency and accountability

3.17 Help Center

- Built-in help center with categorized articles and search
- Admin-managed knowledge base for organizational policies and guides

3.18 LGU-Specific Modules

CUSTOM LGU ADDITIONS — The following modules are purpose-built for Local Government Units and are not available in the standard private sector offering.

■ Service Record Generation

Automated generation of employee service records following the **CSC Form 212** format. The system compiles complete employment history — including appointments, promotions, transfers, and separations — into a standardized, print-ready service record. This eliminates the tedious manual preparation of service records and ensures accuracy for retirement, benefits claims, and CSC submissions.

- Auto-generated service records in official CSC Form 212 format
- Complete employment history compilation from system data
- Print-ready output for official submissions and employee requests
- Historical data preservation for separated and retired employees

■ Plantilla Management

Comprehensive management of the LGU's **plantilla of positions** — the official listing of authorized positions and their corresponding salary grades. The module tracks authorized positions versus filled positions in real time, enabling HR to monitor vacancies, plan hiring, and ensure compliance with DBM and CSC staffing requirements.

- Real-time tracking of authorized positions vs. filled positions
- Vacancy monitoring with department-level breakdown
- Salary grade and step increment mapping per position
- Plantilla report generation for DBM and CSC compliance
- Position creation, reclassification, and abolishment tracking

■ CSC Report Templates

Auto-generation of reports required by the **Civil Service Commission**. The system produces CSC-mandated reports directly from employee data, eliminating manual compilation and ensuring timely, accurate submission. Templates are maintained and updated to reflect the latest CSC reporting requirements.

- Pre-built templates for all major CSC-required reports
- Automated data population from employee records
- Export in CSC-accepted formats for electronic and physical submission
- Template updates to reflect latest CSC circular requirements
- Report scheduling and submission tracking

■ Multi-Office / Satellite Support

Support for **multiple offices and satellite locations** within the LGU structure. This module enables centralized HR management across the city hall, district offices, barangay halls, and other satellite facilities — while maintaining per-office visibility and reporting capabilities.

- Centralized management across city hall, district offices, and satellite locations
- Per-office employee assignment and attendance tracking
- Office-level reporting and analytics with consolidated city-wide views
- Biometric device deployment and sync per office location
- Office-specific work schedules and holiday configurations

4. Technical Specifications

KasamaHR is built on a modern, enterprise-grade technology stack designed for reliability, security, and scalability:

Architecture	Modern single-page application (SPA), cloud-hosted with multi-tenant isolation
Backend	Laravel 12 (PHP 8.4) — a robust, secure, and scalable framework trusted by enterprises worldwide
Frontend	Vue 3 with Inertia.js v2 — delivering a fast, responsive single-page experience with server-side routing
UI Framework	Tailwind CSS v4 — modern, clean, and fully responsive design system
Database	MySQL with Eloquent ORM for efficient data management and relationships
Real-time	Laravel Reverb for real-time notifications and live updates
Authentication	Laravel Fortify with Two-Factor Authentication (2FA) for enhanced security
Security	Role-based access control (RBAC), comprehensive audit logging, data encryption at rest and in transit, HTTPS enforcement
Biometric	MQTT protocol integration for facial recognition devices with real-time sync
Testing	Pest v4 with comprehensive test coverage including browser testing
Responsive	Fully responsive design optimized for desktop, tablet, and mobile devices

5. Implementation Plan

The implementation follows a phased approach over 10 months, ensuring systematic deployment with minimal disruption to ongoing operations:

Phase 1: Foundation

Month 1–2

- System setup, configuration, and environment preparation
- Employee data migration — digitization of existing 201 files
- Department and organizational structure setup
- Plantilla of positions data migration and configuration
- User account creation, role assignment, and initial training
- Biometric device procurement, installation, and integration across offices

Phase 2: Core HR Operations

Month 3–4

- Leave management module go-live with approval workflows
- Attendance and DTR processing activation
- Overtime management and request workflows
- Work schedule configuration and shift management
- Service Record Generation module activation and validation

Phase 3: Payroll & Compliance

Month 5–6

- Payroll system configuration, parallel testing, and validation
- Government contribution table setup and verification
- Government report generation testing and compliance validation
- CSC Report Templates configuration and testing
- Loan management setup and integration with payroll

Phase 4: Talent Management

Month 7–8

- Performance management cycle configuration and goal-setting framework
- Recruitment module activation with careers portal launch
- Training and compliance module setup with course creation
- Onboarding and preboarding template configuration

Phase 5: Optimization & Full Rollout

Month 9–10

- Employee self-service portal rollout to all employees

- Multi-Office / Satellite configuration for district and barangay offices
- Analytics dashboard refinement and custom report creation
- Help center content creation with organizational policies
- Full system audit, optimization, and performance tuning
- Final training sessions and knowledge transfer

6. Benefits for Butuan City LGU

Adopting KasamaHR will deliver transformative benefits across the organization:

■ Operational Efficiency

Eliminate manual, paper-based processes. Automate leave processing, attendance tracking, payroll computation, and report generation — freeing HR staff to focus on strategic initiatives.

■ Accuracy & Reliability

Automated computations for payroll, government contributions, and attendance eliminate human calculation errors and ensure consistent, reliable results.

■ Transparency & Accountability

Comprehensive audit trails, approval workflows, and analytics dashboards ensure transparency in all HR operations — meeting COA requirements for accountability.

■ Government Compliance

Built-in, up-to-date contribution tables and automatic report generation ensure continuous compliance with SSS, PhilHealth, Pag-IBIG, BIR, and CSC mandates.

■ CSC-Ready Reporting

LGU-specific modules for Service Records, Plantilla Management, and CSC Report Templates ensure the city is always prepared for Civil Service Commission requirements and audits.

■ Employee Empowerment

The self-service portal with 25+ features allows employees to manage routine HR tasks independently, dramatically reducing HR workload and improving employee satisfaction.

■ Data-Driven Decision Making

Real-time analytics dashboards provide leadership with actionable insights for strategic workforce planning, budget allocation, and organizational development.

■ Multi-Office Scalability

Centralized management across city hall, district offices, and satellite locations with per-office visibility — growing seamlessly as Butuan City expands.

■ Enhanced Security

Role-based access control, two-factor authentication, encrypted data storage, and comprehensive audit logging protect sensitive employee information.

■ Cost Savings

Reduced paper consumption, fewer payroll errors, streamlined operations, and decreased administrative overhead translate to significant long-term cost savings.

■ Modernization

Positions Butuan City as a forward-thinking, digitally-enabled LGU — setting a benchmark for government HR modernization in the Caraga region.

7. Support & Maintenance

HDSysSystem is committed to providing comprehensive ongoing support to ensure the system operates optimally and delivers continuous value:

- **Dedicated Support Team:** Assigned account manager and technical support specialists familiar with your organization's configuration.
- **System Updates & Security Patches:** Regular software updates including new features, performance improvements, and critical security patches.
- **Staff Training:** Comprehensive training programs for HR administrators, supervisors, and end-users — including onsite and remote sessions.
- **Technical Support:** Multi-channel support via email, phone, and ticketing system with defined response time SLAs.
- **System Health Checks:** Regular system performance reviews, database optimization, and infrastructure monitoring.
- **Data Backup & Recovery:** Automated daily backups with disaster recovery procedures to ensure data safety and business continuity.

8. About HDSysSystem

HDSysSystem is the company behind **KasamaHR**, a Philippine-built HRIS designed specifically for Filipino organizations. The name "Kasama" reflects the spirit of partnership and collaboration — working together (*kasama*) to build better workplaces.

The platform is built with deep understanding of Philippine labor laws, government mandates, and organizational culture. Every feature — from government contribution calculations to leave types and compliance reporting — is designed with the specific needs of Philippine organizations in mind.

At HDSysSystem, our mission is to empower Philippine organizations — whether in the public or private sector — with world-class HR technology that is accessible, affordable, and designed to deliver measurable impact on organizational efficiency and employee experience.

9. Contact Information

We welcome the opportunity to discuss this proposal further and demonstrate how KasamaHR can transform HR operations for the City of Butuan.
